

Contents and Index

Subject	Page
T Technical Information	
Copper and Alu-Price Calculation	T 1–T 2
Reference to DIN VDE Standards	T 3–T 4
Harmonized Identification	T 5
Designation code for harmonized cables according to DIN VDE 0281/DIN VDE 0282/DIN VDE 0292	T 6
Code-designation for harmonized cables and flexible cords to DIN VDE 0292 and HD 361 S2	T 7–T 8
Comparison of harmonized cables with IEC, DIN VDE and HD	T 9
Designation code for power cables according to DIN VDE 0271/0276	T 10
Designation code for telephone cables, jumper wires and stranded hook-up wires	T 11
Code-designation-explanations for cables and insulated wire	T 12
Conductor-diameters according to DIN VDE 0295	T 13
Conductor resistance (extracted from DIN VDE 0295, IEC 228 and HD 383)	T 14
Strand make-up to (DIN VDE 0295, IEC 228 and HD 383)	T 15
Nominal voltage and Operating voltage	T 16
Current carrying capacity and indications for calculation of Power Cables and Wires	T 17
Type of Laying Systems and Operating Conditions – Power cables and wires for fixed installation –	T 18
Laying Conditions for Power Cables	T 19
Current ratings for installation A1, A2, B1 and B2, Cables for fixed installation within buildings	T 20
Current ratings for installation conditions C, E, F and G, Cables for fixed installation within buildings	T 21
Current ratings for installation conditions A1, A2, B1 and B2, Cables for fixed installation within buildings	T 22
Current ratings for installation conditions C, E, F and G, Cables for fixed installation within buildings	T 23
Current ratings for cables and insulated wires up to 1000 V and heat resistant cables	T 24
Current ratings for cables ≤0,6/1 kV, Special rubber-insulated single core cables, multicore rubber cables and trailing cables	T 25
Current ratings (general) for flexible cables, for non-existing cable types in the previous tables	T 26
Current ratings for HELUTHERM 145	T 27
Current ratings for silicone cables and wires	T 28
Current ratings for NYY, NAYY, NYCY, NYCWY, NAYCWY 0,6/1 kV	T 29
Current Carrying Capacity for NYKY 0,6/1 kV	T 30
Current ratings – Conversion factors for grouping on the wall, on the floor, in insulation tubes or in conduit and under the ceiling	T 31
Current ratings – Conversion factors for deviating ambient temperature	T 32
Current ratings – Conversion factors for grouping of single core cables or cables on troughs and trays	T 33
Current ratings – Conversion factors for grouping of multicore cables or cables on troughs and trays	T 34
Power ratings for XLPE-insulated; Medium Voltage Power Cables 6/10 kV, 12/20 kV, 18/30 kV	T 35
Electrical characteristics of XLPE-insulated Medium Voltage Power Cables, 6–30 kV	T 36–T 40
Rating conversion factors for installation of Medium Voltage Cables, 6–30 kV	T 41
Rating conversion factors for installation of Medium Voltage Cables, 6–30 kV	T 42
Conversion factor for Medium Voltage Power Cables, 6–30 kV	T 43
Colour code according to DIN VDE 0293	T 44
Colour code according to E DIN VDE 0245 part 1	T 45
Colour code according to DIN 47100 with colour repetition from core no. 45. and above	T 46
Pair-Colour code according to DIN 47100 with colour repetition from pair no. 45 and above	T 47
Colour code HELUKABEL-JB	T 48
Colour code HELUKABEL-OB	T 49
Colour code according to DIN VDE 0813	T 50
Colour code according to DIN VDE 0815	T 51
Colour code according to DIN VDE 0816 and extended	T 52
Colour code for single wire vehicle cables	T 53
Colour Abbreviations according to DIN VDE and IEC	T 54
Identification of insulated wires through colours according to DIN 40705 and IEC 446	T 55
Permissible minimum bending radius according to DIN VDE specifications	T 56
Chemical Resistance of PUR (Polyurethane)	T 57
Chemical Resistance of PUR – Table	T 58–T 59
Chemical Resistance of HELUFLON®	T 60
Characteristics of HELUFLON®	T 61
Chemical Resistance of Silicone	T 62
Resistance of substances against solvents, oils and fats	T 62
Heat-resistance classes as per VDE 0530 part 1	T 63
Caloric load values (heat of combustion)	T 63
Caloric load values of halogen-free Security Cables and insulated wires	T 64–T 66
Caloric load values of halogen-free Cables and insulated wires	T 67
Caloric load values of halogen-free and halogenated cables and insulated wires	T 68–T 70
Information and Installation Instructions for UL and CSA cables	T 71
AWG-Wires and AWG-stranded conductors, Conductor make-up, cross-section, resistance and weight	T 72–T 73
US-American and British units, Conversion of usual measuring units/General measuring units	T 74
Current ratings for UL-CSA cables	T 75
List of UL-Styles (Single core cables)	T 76
List of UL-Styles (Multicore cables)	T 77
Characteristics of insulating and sheath materials	T 78–T 79
International abbreviations	T 80
Definitions: Classes of Stress (Duty) in Flexible Cables and Insulated Wires	T 81
Safety Requirements in the Use of Cables and Insulated Wires	T 82–T 86
Glossary of Terms: Cables and Wires	T 87–T 94
International Certification Marks and Testing Institute	T 95
Formulas of electrotechnic and electronic	T 96
Formulas of power engineering	T 97
Capacity of KTG-Pool drums	T 98
Cable lengths (m) to KTG-Drums – capacity of pool drums	T 99
Explanatory notes on CE marking	T 100–T 101
Part Number Index	T 102–T 112
Table of types of cables and wires	T 113–T 118
